Brought to you from the desk of Fake new

By: Sylvia Coleman

On the morning of October 25, 2019, reports have been noted that ghost sightings have been more common throughout the Bay Area in these past few weeks.

"I was walking into my kitchen when I heard one of the pots fall off of the drying rack," states 18 year old Verone who has just moved into a supposedly haunted apartment. "I didn't think much of it until nighttime, when I was sleeping. In the kitchen there was a racket and it sounded like pots and pans clanging against each other. It got louder and louder. And I got really scared that there was a robber in the house. I grabbed the baseball bat that was on my floor. The clanging pots and pans got closer and closer down the hall. I hid under my covers just as the door creaked open. A bright white light flooded the room and I screamed, then everything stopped. I could feel my fear pulsing through my veins as I peeked out of my blankets. I heard footsteps retreat down the hall and I saw the pots scattered across the floor in my room. The door had been left open. I don't think that any robber would do that. For the next few days, things went missing like my keys. Soon after that I moved houses thinking that my apartment was haunted." Verone is now living in a house that is not haunted and is very scared of the dark or what might be in it. This is why we advise you to check for signs of a ghost like things going missing abruptly and strange noises in the middle of the night. Some ghosts are friendly...some are not If you see any of these signs than maybe consider moving if your ghost constantly pesters you or tries to scare you. This probably means they are trying to avenge their death or are just trying to get you out of 'their' house.

## Climate Strike

By: Amelia Surmick

On September 20, 2019, people around the world walked out of work, school, and homes to strike for the rising change in earth's climate. Just in Santa Rosa on that day, approximately 2000 people rallied in Downtown. At our school "SRCSA", we had a smaller group of people but we couldn't sit on the sidelines.

The day before, we had all grouped together in Ms. Holmstedt's room to create our individual signs. Then the fateful day had come! At middle school lunch recess, we all headed back into Ms. Holmstedt's room and got ready to strike. We made our way down College Avenue holding up our signs and showing that we needed change. We weren't out there for long before cars were honking which caused even more chanting from the protesters. We held up our signs on the way there and back; we want our voices to make a difference! Two years ago, Greta Thunberg shared her frustration but it took until 2019 for it to become a movement because it wasn't getting any better when she started, and it still isn't being taken seriously today.

# November National Days

- November 1: Cook Your Pet a Meal Day
- November 2: Deviled Egg Day
- November 3: Sandwich Day
- November 4: Chicken Lady Day
