

Potato-Animal Project *Wrap Up!* (DUE: 1/9/20)

**Part 1: Summary (not opinion-based)**

> How does your potato-animal behave for survival success and reproductive success? Consider: sleep patterns, aggression, mating behaviors, parenting, and adaptations. This is your time to brag about what makes your organism so special and well-adapted to this habitat type.

**Part 2: Reflection**

> How did the design process go and how did the team work together? What parts did you enjoy the most? If you could do this project again, what would you do differently? If you could make this project better, what you you do/change/add/remove?
